

BURLINGTON ELEMENTARY GREEN TEAM

Teacher Advisor: Heather Breitenstein

THE NEED

- **We identified a need in our community & in our world:**
Burlington Elementary is in need of beautification & pollinators are disappearing

THE MISSION

- **We partnered with an expert in our community:**
UK Extension Office taught us which flowers would grow best in our beds & attract pollinators, how to plant & care for seeds, and gave us pointers for running a successful greenhouse.

THE FUTURE

- **We are helping our school and the world:**
We are planting pollinator-friendly plants (such as Echinacea and Snapdragons) around our flagpole. Then, we are donating the remaining plants to a team of staff, parents, and student volunteers to plant around our school. This will help save the pollinators while also making our school grounds more attractive.
