

Coshocton County Career Center Extreme Green Team 2019

Advisor: Mr. Garretson
Team Leader: Alison Hennis

Summary of the event

The Extreme Green Teams mission was to learn about energy and share the information with others. We attended an energy summit training program where we as a group learned about the different sources of energy. We then broke into individual groups, while in our smaller groups everyone learned about a different type of energy that they would teach about. We also learned how to facilitate energy carnival games and circuit board activities. A few weeks after the summit we went back and taught everything we learned to a group of about 100 5th graders. We set up tri-fold boards that talked about the different sources of energy, then we taught our specific activities about the types of energy once we were all done with that we got to play the games to kind of review the sources of energy with the students. We met our goals of learning for ourselves and teaching others about energy.

Thank you,

Coshocton County Career Center Energy Team

Extreme Green Team

Foundation project

Goal: Conduct an Energy Fair for 5th grade students

Activities and Tasks:

1. *Participate in the E3 Smart Program to learn about energy efficiency.*
2. *Participate in Energy Summit to learn energy situations and carnival games.*
3. *Conduct some of the activities at our school.*
4. *Conduct the Energy Fair.*

Leadership: 8 students from Mr. Garretson's environmental Science class

Evaluation: About 100 5th grade students completed all 20 energy stations and participated in carnival games

Energy Fair 2019!
