

What is the best form of energy?

By: Kylie Miller, Keegan Moore, Jacob Sloan,
Arianna Schaus

What is energy?

Energy makes up literally everything. It is everywhere and in everything but there are many different types of energy. There is light, heat, gravity, chemical, electrical, nuclear, and many others. It does all types of things for us it can cook our food, provide heat and light for our homes, and many other things.

Forms of energy

- ❑ Nuclear
- ❑ Solar
- ❑ Geothermal
- ❑ Hydropower
- ❑ Biomass
- ❑ Wind
- ❑ Fossil Fuels
- ❑ Natural gas

Renewable or Nonrenewable?

Renewable

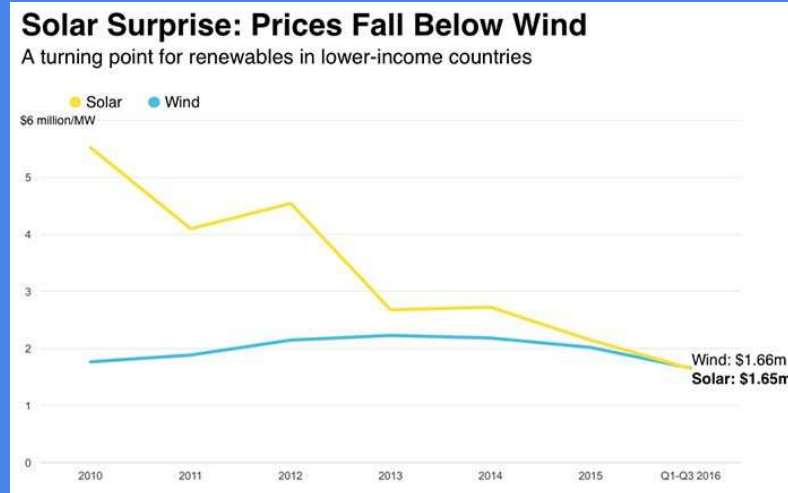

- ❖ Solar
- ❖ Wind
- ❖ Hydroelectric
- ❖ Geothermal
- ❖ Biomass

Nonrenewable

- ❖ Nuclear
- ❖ Fossil Fuels
- ❖ Natural Gas

Cheapest Form of Energy

The cheapest form of energy is solar energy. It gives people the reason to ditch fossil fuels and other energy sources
