

# MEDLAR VIEW ELEMENTARY ENERGY

**Teacher Leader: Mrs. Nikki Aucoin**

# LEARNING ABOUT ENERGY

We learned about the sources of energy and the difference between renewable and nonrenewable resources! This gave us lots of background knowledge and we had fun while we learned!

# ENERGY BRAINSTORMING

After learning about the sources of energy, we charted how much energy we use on a daily basis. Then, we brainstormed how we can save energy. Here's some ideas we came up with:

- Use electronics wisely
- Turn off water when you are not using it
- Turn off lights when you leave a room
- Power down your computer when you are not using it
- Limit time on electronics
- Try to get a ride with friends (carpool)
- Unplug stuff when not in use
- Walk more
- Turn off the lights when you are watching TV or playing video
