

# Independent or Special Category Projects: Scituate Virtual Art Club

- **School Name: Scituate Schools**
- **Project Title: Stop Motion Energy!**
- **Advisor's Name: Shannon Donovan and Carly Davis**
- **Our virtual art club started meeting late in the fall because we couldn't have any clubs at school because of Covid. Our club has students from kindergarten to grade 8. One of our big projects was to use stop animation to teach something about saving energy. So, we learned about the forms and sources of energy. We learned about the difference between energy efficiency and energy conservation. We learned to be creative with the materials that we had available. After we picked our topics, we made storyboards. Then we took LOTS of pictures and put them together to make videos. We hope you enjoy them!**

# Use renewable energy!!!

Student leader/artist: Connor

Message: Use less energy from the grid by collecting some solar energy on your home

# Go outside and play!!!

Student leaders/artists:

Savannah and Wyatt

Message: Save energy by  
playing outside!

# Things you can do with no electricity!!!!

Student leader/artist: Minka

Message: There are lots of fun things we can do that don't involve electricity. I like to ride my bike!

# Let's go riding!!!

Student leader/artist: Melanie

Message: Play outside instead of using electricity to watch TV and play video games. I would like to go ride a horse!

# Family Engagement

Principles shared our work through their parent newsletters to celebrate the work of our club members.
