

Energizing Energy Concepts

Twin Valley South MS Energy Team

Advisor: Catherine Ackerman

The 2018-19

school year was an

eventful one for the TVS energy

team. The team welcomed five new

members and was able to keep most of our

members from the previous year, making us more

successful than ever. Our goals for the season were to increase

our skills and make an impact on elementary-age students while teaching

them about energy. The middle school team achieved our goals by working together

and growing leadership skills. The new members got guidance from the mentor middle

school team members. We look forward to applying our skills during next year's season.
